# standUP Features:

- Sustainability – Not requiring electricity, both saves money and the environment. standUP is the mechanism to specify for companies seeking to achieve a Leed certification.
- Productivity – Providing Sit/Stand helps to attract and to hold the best staff. Employees become more engaged when they feel that their company shows concern for their Wellness.
- Health - Changing your posture elevates one's body's metabolism. An elevated metabolism keeps a steady stream of oxygen and glucose to the brain... increasing productivity.
- Absenteeism - Changing one's posture improves one's health. Wellness reduces absenteeism due to illness.
- Less Breaks – Intermittently standing reduces the need to take as many breaks.
- User Safe – Being attached to the Panels or the End Gables of Desks and Credencas, standUP won't shift in the workstation like electrical tables do. It maintains a safe one inch from the adjacent worksurfaces.
- Less Clutter - The worksurface is not consumed as with Desk Surface Mounted Mechanisms when the User is not at their computer. This leaves space available for paperwork.
